

Onboarding Fixes Summary

Date: June 5, 2026

Project: Luciteria Collector Cabinet

Fixes Applied

1. Reduced Font Sizes on Onboarding Periodic Table

Problem: The doubled font sizes (32px/18px/14px) were too large for the onboarding “Log Owned” screen, making elements appear cramped.

Solution:

- Added scoped CSS class `.ptable-onboarding` in `app/tailwind.css`
- Font sizes for onboarding only:
- Element symbol: **16px** (was 32px)
- Atomic number: **9px** (was 18px)
- Element name: **7px** (was 14px)
- Collection and Shop pages retain the larger doubled sizes (32px/18px/14px)

Files Modified:

- `app/tailwind.css` - Added scoped CSS overrides
 - `app/components/WireframePeriodicTable.jsx` - Added `className` prop support
 - `app/routes/onboarding.log-owned.jsx` - Applied `className="ptable-onboarding"`
-

2. Added “Other” Format Option to Onboarding

Problem: The format dropdown on the onboarding “Log Owned” step was missing “Other” as an option, which is available in the Notes Modal.

Solution:

- Added “Other” format to `FORMATS` object in `app/lib/formats.js`
- Format details:
- **ID:** `other`
- **Name:** `Other`
- **Icon:** 
- **Sort Order:** 6 (appears last in dropdown)
- **Availability:** All 118 elements (same as Lucite)
- **Collectible Cap:** 118 elements

Files Modified:

- `app/lib/formats.js` - Added “Other” format definition
 - Updated `getAvailableElementsForFormat()` to include “Other” with all elements
 - Updated `getCollectibleCap()` to return 118 for “Other” format
-

Technical Implementation

CSS Structure

```
/* Global (Collection/Shop pages) - Doubled sizes */
.cell .num { font-size: 18px; }
.cell .sym { font-size: 32px; }
.cell .nm { font-size: 14px; }

/* Onboarding-specific override - Original sizes */
.ptable-onboarding .cell .num { font-size: 9px; }
.ptable-onboarding .cell .sym { font-size: 16px; }
.ptable-onboarding .cell .nm { font-size: 7px; }
```

Format Configuration

```
FORMATS = {
  '10mm': { id: '10mm', name: '10mm Cube', icon: '🟩', sortOrder: 1 },
  '25.4mm': { id: '25.4mm', name: '1-inch Cube', icon: '🟨', sortOrder: 2 },
  '50mm': { id: '50mm', name: '50mm Cube', icon: '🟦', sortOrder: 3 },
  'lucite': { id: 'lucite', name: 'Lucite Cube', icon: '💎', sortOrder: 4 },
  'ampoules': { id: 'ampoules', name: 'Ampoule', icon: '💉', sortOrder: 5 },
  'other': { id: 'other', name: 'Other', icon: '📦', sortOrder: 6 }, //
  NEW
}
```

Testing Results

Visual Verification

- Onboarding periodic table displays smaller, more readable element cells
- Format dropdown shows all 6 options including “Other”
- Collection page retains larger font sizes (unchanged)
- Shop page retains larger font sizes (unchanged)

Build Status

- ✓ Client built successfully in 2.30s
- ✓ Server built successfully in 683ms

Impact

User Experience

- **Onboarding:** Cleaner, less cramped periodic table that fits better on screen
- **Format Selection:** Users can now select “Other” for non-standard collection formats
- **Consistency:** “Other” format matches what’s available in Notes Modal

Data Integrity

- “Other” format supports all 118 elements (same as Lucite)
 - Completion percentage calculations work correctly for “Other” format
 - No breaking changes to existing functionality
-

Files Changed

1. `app/tailwind.css` - CSS overrides for onboarding
 2. `app/components/WireframePeriodicTable.jsx` - Component prop enhancement
 3. `app/routes/onboarding.log-owned.jsx` - Applied scoped CSS class
 4. `app/lib/formats.js` - Added “Other” format definition and logic
-

Status:  All fixes implemented and tested

Ready for: Production deployment
