

Responsive Font Sizes Implementation

Date: June 5, 2026
Status:  Complete

Overview

Replaced fixed-size periodic table fonts with responsive breakpoints that automatically adapt to screen size across **all pages** (Collection, Shop, Onboarding).

Implementation Details

Font Size Breakpoints

Screen Size	Viewport Width	Symbol	Atomic#	Name
Small (Mobile)	< 768px	16px	9px	7px
Medium (Tablet/Laptop)	768px - 1279px	24px	14px	10px
Large (Desktop)	≥ 1280px	32px	18px	14px

Mobile-First Approach

Using CSS `@media (min-width)` queries to progressively enhance from small to large screens:

```
/* Default: Mobile (< 768px) */
.cell .num { font-size: 9px; }
.cell .sym { font-size: 16px; }
.cell .nm { font-size: 7px; }

/* Medium screens (768px+) */
@media (min-width: 768px) {
  .cell .num { font-size: 14px; }
  .cell .sym { font-size: 24px; }
  .cell .nm { font-size: 10px; }
}

/* Large screens (1280px+) */
@media (min-width: 1280px) {
  .cell .num { font-size: 18px; }
  .cell .sym { font-size: 32px; }
  .cell .nm { font-size: 14px; }
}
```

Changes Made

1. `/app/tailwind.css`

- ☒ Removed fixed font sizes (old: 32px/18px/14px globally)
- ☒ Added mobile-first responsive sizing (16px/9px/7px default)
- ☒ Added `@media (min-width: 768px)` for medium screens (24px/14px/10px)
- ☒ Added `@media (min-width: 1280px)` for large screens (32px/18px/14px)
- ☒ **Removed** `.ptable-onboarding` override (no longer needed)

2. `/app/routes/onboarding.log-owned.jsx`

- ☒ Removed `className="ptable-onboarding"` prop from `<WireframePeriodicTable>`
- ☒ Now uses same responsive sizing as all other pages

3. `/app/components/WireframePeriodicTable.jsx`

- ☒ Updated JSDoc comment to reflect responsive font sizing
- ☒ Removed outdated `ptable-onboarding` example

Affected Pages

All periodic table instances now use the same responsive sizing:

1. **Dashboard** → “Collection Overview” widget
2. **Collection** (`/app/cabinet/periodic-table`) → Main periodic table
3. **Shop** (`/app/cabinet/shop`) → Product-linked periodic table
4. **Onboarding: Log Owned** (`/onboarding/log-owned`) → Initial collection setup
5. **Notes Overlay** → Element status modal

Testing Checklist

- ☐ View Collection page on mobile (< 768px) → fonts should be smallest
- ☐ View Collection page on tablet/laptop (768-1279px) → fonts should be medium
- ☐ View Collection page on desktop (≥ 1280px) → fonts should be largest
- ☐ Repeat for Shop page
- ☐ Repeat for Onboarding flow
- ☐ Verify count badges and checkmarks still display correctly at all sizes

Browser Compatibility

Uses standard CSS `@media` queries supported by all modern browsers:

- Chrome/Edge 88+
- Firefox 78+
- Safari 14+
- Mobile browsers (iOS Safari, Chrome Mobile)

Performance Impact

-  No JavaScript required (pure CSS)
 -  No additional HTTP requests
 -  Minimal CSS overhead (3 media queries)
 -  No render-blocking resources
-

Rollback Instructions

If responsive sizing needs to be reverted:

1. **Restore fixed sizes in** `/app/tailwind.css` :

```
css
.cell .num { font-size: 18px; }
.cell .sym { font-size: 32px; }
.cell .nm { font-size: 14px; }
```

2. **Re-add onboarding override (if needed):**

```
css
.ptable-onboarding .cell .num { font-size: 9px; }
.ptable-onboarding .cell .sym { font-size: 16px; }
.ptable-onboarding .cell .nm { font-size: 7px; }
```

3. **Re-add className to onboarding route:**

```
jsx
<WireframePeriodicTable
  elements={elements}
  states={states}
  showChecks
  onCellClick={toggle}
  className="ptable-onboarding"
/>
```

Future Enhancements

Consider adding responsive adjustments for:

- Grid gap spacing (currently 4px fixed)
 - Count badge size on mobile
 - Check icon size on mobile
 - Border width adjustments
-

Build Verification:  `npm run build` successful (June 5, 2026)
